WORK EXPERIENCE

Associate Software Engineer
Light & Wonder

08/2022 - Present   *Bangalore, India*

Achievements/Tasks
- Worked in various technologies related to Full Stack Development.
- Frontend Tech Experience include React, Flutter.
- Backend Tech Experience include C#, C++, Kotlin.
- I have worked on Automation using Python.

PROJECTS

Notify Android Application (01/2023 - Present)
- Developed an Android application to group and keep track of tasks and notes.
- A lot of customization features are added into it.
- The application is available for download and use via my portfolio along with lot of other projects.

Placements Web Application (07/2020 - 07/2022)
- Built using Python-Django, HTML/CSS, JavaScript, Bootstrap.
- It is a website I designed in order to help my college as well as my fellow students.
- Students can learn the basic aptitude topics from my website which will be helpful for placements.
- College can communicate with students regarding the companies visiting the college, keeping the students updated.

Smart Car Parking System using Image Processing Techniques (2020 - 2021)
- I used Arduino,Python-opencv.
- This project helps people at parking slots by displaying the number of slots left in that parking space.
- This helps in avoiding the unnecessary travelling of vehicles across the filled parking slots in a city.
